Preface vii

Committees viii

Photograph of delegates at Metal Forming *96*, Kraków ix

Invited Keynote Papers

Process and product integration: research challenges 1
P.D. Hodgson, M.J. Cardew-Hall

An overview of numerical modelling techniques. 8
J.-L. Chenot, F. Bay

The role of neural networks in the optimisation of rolling processes. 16
J. Larkiola, P. Myllykoski, A.S. Korhonen, L. Cser

Modelling of damage in metal forming processes 24
J.C. Gelin

Dislocation theory based constitutive modelling: foundations and applications 33
Y. Estrin

Sheet Forming and Stretching (1)

Analytical and experimental studies of necking in sheet metal forming processes. 40
M. Brunet, S. Mguil, F. Morestin

The effect of the rheological behaviour and the tribological parameter on sheet metal forming using a new model for orthotropic plasticity 47
Z. Tourki

Simulation of multi-step sheet metal forming processes by a static explicit FEM code 54
M. Kawka, T. Kakita, A. Makinouchi

An assessment of numerical parameters influencing springback in explicit finite element analysis of sheet metal forming process 60
S.W. Lee, D.Y. Yang

Defining the operating window for an automotive sheet pressing operation. 68
J.C. Herron, P.D. Hodgson, M.J. Cardew-Hall

Three dimensional multi-step inverse analysis for the optimum blank design in sheet metal forming processes 76
C.H. Lee, H. Huh

Some problems in steel sheet forming processes. 83
E. Bayraktar, S. Altintas

Superplasticity

The effect of microstructural gradients on superplastic forming of Ti–6Al–4V. 90
S. Rhaipu

Modelling heterogeneous microstructures, inhomogeneous deformation and failure in superplasticity 96
F.P.E. Dunne, T.-W. Kim

Elsevier Science S.A.

Stamping, Coining and Blanking

Coining process as a means of controlling surface microgeometry 101
H. Ike, M. Plancak

The evaluation of springback in 3D stamping and coining processes. 108
A. Forcellese, L. Fratini, F. Gabrielli, F. Micari

Design of a piercing hole in coining process by the three-dimensional backward tracing scheme of the FEM 113
H.-H. Choi, M.-S. Park, B.-S. Kang

Finite element analysis of optimum clearance in the blanking process 121
F. Faura, A. García, M. Estrems

Experimental study on the shearing behaviour of fine-blanking versus bar cropping. 126
L.C. Chan, T.C. Lee, B.J. Wu, W.M. Cheung

Forging

Expert system for hot forging design 131
Â. Caporalli, L.A. Gileno, S.T. Button

Application of a genetic algorithm to process optimal design in non-isothermal metal forming 136
J.S. Chung, S.M. Hwang

Preform design for forging of aerofoil sections using FE simulation 144
H. Ou, R. Balendra

Three-dimensional finite element modelling of a titanium aluminide aerofoil forging 149
J.W. Brooks, T.A. Dean, Z.M. Hu, E. Wey

Cold forging of high strength aluminum alloys and the development of new thermomechanical processing 156
O. Jensrud, K. Pedersen

Analysis of the cogging process for heavy ingots by finite element method and physical modelling method 161
J.R. Cho, W.B. Bae, Y.H. Kim, S.S. Choi, D.K. Kim

Prediction of mechanical properties of heavy forgings 166
J. Sinczak, J. Majta, M. Glowacki, M. Pietrzyk

Processes of partial bulk metal-forming—aspects of technology and FEM simulation 174
R. Glaß, F. Hahn, M. Kolbe, L.W. Meyer

Forging of complex geometries with differential heating 179
E. Merrygold, F.H. Osman

Simulation of coupled problem of electric upsetting 184
N. Biba, A. Lishnij, A. Vlasov

Modelling of density and dimensional changes in re-pressing/sizing of sintered components 188
A. Rosochowski, L. Beltrando, S. Navarro

Some aspects of energy distribution in rotary forming processes 195
T. Canta, D. Frunza, D. Sabadus, C. Tintelecan

Ring Rolling

A finite-element simulation of profile ring rolling using a hybrid mesh model 199
T. Lim, I. Pillinger, P. Hartley

Simulation of a multi-stage railway wheel and tyre forming process 206
M.J. Ward, B.C. Miller, K. Davey

Roll Forming

Modelling of a roll-forming process with a combined 2D and 3D FEM code 213
M. Brunet, S. Mguil, P. Pol

The use of 'free-flowing' surfaces in tooling design for roll forming 220
S.M. Panton, T.R. Lissington, J.L. Duncan

Characteristic features of shape defects occurring in the cold roll forming of pre-notched products 225
H. Watari, H. Ona

Friction, Lubrication and Surface Phenomena

The effect of lubricant additives on the coefficient of friction in cold rolling 232
J.G. Lenard

A comparison of friction coefficients in cold rolling 239
J. Jeswiet

Three selection criteria for the cold metal forming lubricating oils containing extreme pressure agents 245
L. Lazzarotto, L. Dubar, A. Dubois, P. Ravassard, J. Oudin

Characterising frictional behaviour in sheet metal forming 251
J.M. Lanzon, M.J. Cardew-Hall, P.D. Hodgson

An alternative method between implicit and explicit schemes devoted to frictional contact problems in deep drawing simulation 257
F. Jourdan, M. Jean, P. Alart

Monitoring of friction processes by the means of acoustic emission measurements—deep drawing of sheet metal 263
T. Skåre, P. Thilderkvist, J.-E. Ståhl

Analysis of interfacial slip in cross-wedge rolling: an experimentally verified finite-element model 273
Y. Dong, M. Lovell, K. Tagavi

Comparative investigations of interfacial heat transfer behaviour during hot forging and rolling of steel with oxide scale formation 282
Y.H. Li, C.M. Sellars

Analysis of the asymmetric upsetting test with extremely high strain rate as tool for friction measurement 287
O. Pawelski, W. Rasp, C. Wolff

Friction studies at different normal pressures with alternative ring-compression tests 292
X. Tan, P.A.F. Martins, N. Bay, W. Zhang

2D and 3D simulation of complex multistage forging processes by use of adaptive friction coefficient 298
A. Behrens, H. Schafstall

Finite element analysis of shot peening. 304
A. Levers, A. Prior

Lining of metal plates with foils using hot shot peening. 309
Y. Harada, K. Mori, S. Maki

Influence of surface texture on orange peel in aluminum 315
P.S. Lee, H.R. Piehler, B.L. Adams, G. Jarvis, H. Hampel, A.D. Rollett

Rolling

Mathematical modelling of mill set-up in hot strip rolling of high strength steels 320
N. Rudkins, P. Evans

FE simulations of camber in hot strip rolling 325
A. Nilsson

Steel strip production—a pilot application for coupled simulation with several calculation systems. 330
P. Adamidis, A. Beck, U. Becker-Lemgau, Y. Ding, M. Franzke, H. Holthoff, M. Laux, A. Müller, M. Münch, A. Reuter, B. Steckel, R. Tilch

Experimental study of long product cooling in hot rolling. 337
J. Horský, M. Raudenský, P. Kotrbáček

A study of PSW rolling process using stream functions 341
Y.-M. Hwang, H.-H. Hsu, G.Y. Tzou

Satellite-mill rolling of U-shaped and H-shaped wires 345
H. Utsunomiya, Y. Saito, T. Kawamoto, H. Matsuzawa

Development of an elongation-controlled mill. 351
Y. Saito, H. Utsunomiya, M. Shinkawa, F. Shimaya

A novel method for prediction of rolled cross section shape 356
J. Wen, D.M. Petty

Changes of pass geometry of the system of oval and vertical oval stretching passes in the rolling process 361
E. Łabuda, H. Dyja, P. Korczak

Modeling the helical rolling of rods in a three-high mill 365
R. Lapovok, S. Smirnov, V. Solomein

A study of cross wedge rolling process 370
Zb. Pater

Wire and Bar Drawing

Influence of strain path in the mechanical properties of drawn aluminum alloy bars 376
M.T.P. Aguilar, P.R. Cetlin, P.E. Valle, E.C.S. Corrêa, J.L.L. Rezende

Back tension value in the fine wire drawing process 380
A. Skołyszewski, M. Paćko

The influence of die semi-angle and of the coefficient of friction on the uniform tensile elongation of drawn copper bars 388
H.B. Campos, P.R. Cetlin

Development of utility programs for a cold drawing process 392
K. Sawamiphakdi, G.D. Lahoti, J.S. Gunasekera, R. Kartik

Modelling and measurements of mechanical behaviour in multi-pass drawing process 398
J. Luksza, J. Majta, M. Burdek, M. Ruminski

Deep Drawing

An application of ultrasonic vibration to the deep drawing process 406
T. Jimma, Y. Kasuga, N. Iwaki, O. Miyazawa, E. Mori, K. Ito, H. Hatano

Adaptable tooling sets for metal forming of geometrically similar products 413
T. Pepelnjak, K. Kuzman

Artificial intelligence identification of process parameters and adaptive control system for deep-drawing process 421
K. Manabe, M. Yang, S. Yoshihara

Evaluation of the forming limit of aluminum square cups 427
Y. Marumo, H. Saiki

Influence of initial back stress on the earing prediction of drawn cups for planar anisotropic aluminum sheets 433
J.W. Yoon, F. Barlat, K. Chung, F. Pourboghrat, D.Y. Yang

Mushy-state Forming

Inclusion of pressure of liquid phase in three-dimensional distinct element simulation of mushy-state forming 438
M. Otsu, K. Mori, K. Osakada

An investigation of the mushy state forging process by the finite element method 444
C.G. Kang, B.S. Kang, J.I. Kim

Finite element analysis of compression holding step in semi-solid forging and experimental confirmation 450
J.C. Choi, H.J. Park, B.M. Lee

Thin-strip casting—modelling of the combined casting/metal-forming process 458
R. Kopp, F. Hagemann, L. Hentschel, J.W. Schmitz, D. Senk

Some studies regarding thixoforming of metal alloys 463
W. Lapkowski

Neural Networks

Predicting the mean temperature of the transfer bar after rolling in the rougher using a neural network 469
A. Nilsson

Neural networks for providing 'on-line' access to discretised modelling techniques 475
A.J. Trowsdale, T.W. Usherwood, J.E.J. Wadsworth, M. Patel, D.C.J. Farrugia

Using neural network models for predicting mechanical properties after hot plate rolling processes 481
P. Korczak, H. Dyja, E. Łabuda

Methodology of preform design considering workability in metal forming by the artificial neural network and Taguchi method 487
D.C. Ko, D.H. Kim, B.M. Kim, J.C. Choi

Effect of the training set size on springback control by neural network in an air bending process 493
A. Forcellese, F. Gabrielli, R. Ruffini

Generic algorithm for sheet metal working tool selection, using curve matching and tree searching 501
E. Summad, E. Appleton

Prediction of damage evolution in forged aluminium metal matrix composites using a neural network approach 507
S.M. Roberts, J. Kusiak, Y.L. Liu, A. Forcellese, P.J. Withers

Material Models, Constitutive Laws and Yield Criteria

Modelling on flow stress of Mg–Al–Zn alloys at elevated temperatures 513
H. Takuda, H. Fujimoto, N. Hatta

Measurement and analysis of differential work hardening in cold-rolled steel sheet under biaxial tension 517
T. Kuwabara, S. Ikeda, K. Kuroda

Modelling of the influence of thermomechanical processing of Nb-microalloyed steel on the resulting mechanical properties 524
J. Majta, R. Kuziak, M. Pietrzyk

Computer aided development of a bending–drawing test for thin metallic sheets 531
G. Ferran, A.C. de Moura, L.P. Moreira

Calibration of anisotropic yield criteria using uniaxial tension tests and bending tests. 538
K.A. Malo, O.S. Hopperstad, O.G. Lademo

Biaxial tests on cruciform specimens for the validation of crystallographic yield loci 545
E. Hoferlin, A. Van Bael, P. Van Houtte, G. Steyaert, C. De Maré

Effects of the yield criterion on local deformations in numerical simulation of profile forming 551
O.S. Hopperstad, T. Berstad, H. Ilstad, O.-G. Lademo, M. Langseth

Constitutive equation development for high strain deformation processing of aluminum alloys 556
R.N. Wright, M.S. Paulson

Identification of material parameters directly from metal forming processes 560
O. Ghouati, J.C. Gelin

Fractal modelling of materials 565
I. Avery, F.R. Hall, C.E.N. Sturgess

Damage, Defects and Formability

Computationally-experimental workability determination of compressed cylindrical specimen with surface defect 572
J. Petruška, L. Janíček

Prediction of central bursting in extrusion 579
H. Moritoki, E. Okuyama

Deforming and fracture of metals. The model of damageable thermoelastoviscoplastic medium 585
A.B. Kiselev, M.V. Yumashev, O.V. Volod'ko

Plastic and viscoplastic damage models with numerical treatment for metal forming processes. 591
E. Bellenger, P. Bussy

Optimization of metal forming process parameters with damage minimization 597
P. Picart, O. Ghouati, J.C. Gelin

Estimation of tool life in bulk metal forming based on different failure concepts 602
B. Falk, U. Engel, M. Geiger

Improvement of die life by minimisation of damage accumulation and optimisation of preform design 608
R. Lapovok

Numerical Methods

Surface modelling and mesh generation for simulating superplastic forming 613
J. Lin, A.A. Ball, J.J. Zheng

Application of explicit FE codes to simulation of sheet and bulk metal forming processes 620
J. Rojek, E. Oñate, E. Postek

An extension of the radial return algorithm to account for rate-dependent effects in frictional contact and visco-plasticity 628
J.-P. Ponthot

Improvement of optimum process design system by numerical simulation. 635
T. Ohata, Y. Nakamura, T. Katayama, E. Nakamachi, N. Omori

Analysis of metal forming process based on meshless method 642
J.-S. Chen, C.M.O.L. Roque, C. Pan, S.T. Button

Extrusion

Finite element modelling of cold forward extrusion using updated Lagrangian and combined Eulerian–Lagrangian formulations 647
B.P.P.A. Gouveia, J.M.C. Rodrigues, P.A.F. Martins

An experimental study on the nonaxisymmetric square-die extrusion using model material test 653
Y.H. Kim, W.B. Bae, J.R. Cho, J.W. Park

Three-dimensional material flow analysis of asymmetric hollow extrusions 657
A.R. Bandar, K. Lorcharoensery, W.Z. Misiolek

Evaluation of elasticity and temperature effects on the dimensional accuracy of back-extruded components using finite element simulation. 665
H. Long, R. Balendra

A study on optimal design for CONFORM process 671
Y.H. Kim, J.R. Cho, H.S. Jeong, K.S. Kim, S.S. Yoon

Tube and Pipe Forming

Tube spinnability of AA 2024 and 7075 aluminum alloys 676
S.-C. Chang, C.-A. Huang, S.-Y. Yu, Y. Chang, W.-C. Han, T.-S. Shieh, H.-C. Chung, H.-T. Yao, G.-D. Shyu, H.-Y. Hou, C.-C. Wang, W.-S. Wang

Analysis of the effect of die shape on the distribution of mechanical properties and strain field in the tube sinking process 683
M. Rumiński, J. Łuksza, J. Kusiak, M. Paćko

Study of cold tube drawing by finite-element modelling 690
P. Karnezis, D.C.J. Farrugia

Inside bead forming of aluminum tube by electro-magnetic forming 695
Y. Murakoshi, M. Takahashi, T. Sano, K. Hanada, H. Negishi

Simplified three-dimensional simulation of rotary piercing of seamless pipe by rigid–plastic finite-element method 700
K. Mori, H. Yoshimura, K. Osakada

Sheet Forming and Stretching (2)

Surface roughening during uniaxial and equi-biaxial stretching of 70-30 brass sheets 707
R. Mahmudi, M. Mehdizadeh
